### PROFESSIONAL SUMMARY

- Results-driven Software Developer with 7+ years of experience with a proven track record in front-end development, specializing in **ReactJS, Redux, Angular, Vue3, Node JS, TypeScript, JavaScript, ES5, ES6, HTML5** and **CSS3**.
- Committed to transforming development processes and ensuring exceptional user experiences.
- Proven ability to collaborate with cross-functional teams, identify and resolve complex operational problems, and bring innovation to solution-delivery processes.

#### My expertise includes:

- Skilled in JavaScript frameworks such as **React.js** and **Node.js**, with expertise in integration with back-end resources through **REST API**.
- Strong understanding of React concepts like **JSX, virtual DOM, and component lifecycle**.
- Successfully implemented a complex **Redux state management** system in a large-scale project.
- Familiar with **React hooks** like **useState, useEffect, and useContext** for better code organization and reuse.
- Skilled in executing asynchronous requests proficiently using libraries such as **Axios** and the **Fetch API**.
- Conducted unit testing and integration testing using testing libraries like **Jest** and **React Testing Library** to maintain code quality and reliability.
- Advanced proficiency in using CSS frameworks like **Bootstrap, Material UI, and Tailwind** for styling and creating **Responsive Web designs**.
- Followed Responsive Design Principles to create websites using a **Mobile-first approach, Media queries, Flex concepts, and Fluid Grids**.
- Proficient in **troubleshooting and debugging** issues in React applications, utilizing browser developer tools.
- Implemented and maintained version control using **Git**, ensuring seamless collaboration among team members and allowing for efficient code tracking and management.
- Proficient in configuring **Webpack and Babel** with TypeScript for bundling and transpiling React applications.
- Competent in creating, managing, and prioritizing issues, tasks, and user stories within **Jira**.
- Adept at **Agile Methodologies, Software Development Life Cycle, and BDD** for effective teamwork and project management.
- Excellent **time management** and **problem-solving** skills to meet project deadlines.
- Proficient in conveying complex technical concepts to technical and non-technical team audiences.

### EDUCATION

Bachelor of Technology in Computer Science, MG University, India  
2016

### CERTIFICATIONS

PURSUEING AWS SOLUTION ARCHITECT ASSOCIATE CERTIFICATION

### EXPERIENCE

#### Front End Developer

WanAssist - Freelancer

Nov 2024

- Designing and implementing responsive layouts, forms, and interactive components using Angular 17, React 18, Typescript, and SCSS for multiple projects.
- Deployment using AWS services like EC2 instances/S3, and Route 53.
- Language translations using i18n internalization to implement French and English.

#### Software Engineer

AppFabs Inc | Client: Nlogic

Feb 2024 – Oct 2024

- Designing and implementing responsive layouts, forms, and interactive components using Angular 13, Typescript, SCSS, and

Synfusion grid for table integration in front-end.

- Translated ambiguous requirements into functional features by working closely with professionals and stakeholders to understand their needs and by implementing complex business logic and workflows within the Angular application.
- Leveraged npm (Node Package Manager) proficiently within Angular projects to manage dependencies, streamline package installations, and facilitate efficient project scaffolding, ensuring optimized development workflows and reliable application builds.
- Proficiently utilized Azure DevOps for meticulous task tracking, bug identification, and resolution, ensuring efficient bug-fixing processes and streamlined task management for successful project outcomes.

## Senior Software Engineer

Mar 2022 - Aug 2023

### Quest Global | Client: Canon Medical

- Designing and implementing responsive layouts, forms, and interactive components using React JS, JSX, SCSS, and Tailwind CSS.
- Translated ambiguous requirements into functional features by working closely with professionals and stakeholders to understand their needs and by implementing complex business logic and workflows within the React application.
- Leveraged Fetch and Axios libraries in React to establish efficient asynchronous data fetching and handling from RESTful APIs, ensuring seamless communication between the front-end and back-end, resulting in enhanced application performance and responsiveness.
- Reduced the number of application bugs from 40 to 5 by conducting unit and integration tests using JEST and React Testing Library.
- Implemented Git-based deployment strategies, leveraging tools like GitHub Actions, to automate the deployment pipeline and efficiently push code changes to production, ensuring a streamlined and reliable deployment process.
- Clear and comprehensive documentation of design decisions and diagrams to understand the overall structure and design principles.

## Senior UI Developer

Sep 2019 - Mar 2022

### Reflections Info Systems Pvt Ltd | Clients: Svast, PASS ML

- Developed a responsive user interface with interactive components and optimized forms using a combination of React, JSX, and Bootstrap 5, ensuring seamless functionality across diverse devices and screen sizes.
- Enabled seamless collaboration across internal teams and vendors by orchestrating weekly meetings, delivering comprehensive task lists, and setting clear deadlines for developers, leading to the enhancement and refinement of products and services.
- Employed performance optimization techniques such as memoization, virtual DOM usage, and code splitting to enhance application speed and responsiveness.

## Software Engineer

Jul 2017 - Sep 2019

### Cycloides Technologies Clients: Tune Protect, Commissionaires

- Transformed UX wireframes from the design team into production-ready, responsive, and accessible components using React, JavaScript, PHP and Bootstrap, resulting in a remarkable 2x enhancement in website performance.
- Effectively utilized the component lifecycle methods in React 15 to manage state, and side effects, and optimize performance.
- Integrated APIs using Axios and unit testing with Jest to ensure the app would not crash due to API changes.

---

## SKILLS

---

**Front-End Technologies:** React.js, Angular, Vue, JavaScript, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS, Material UI

**Back-End Technologies:** Node.js, Express, Python

**AWS cloud services**

**Testing Libraries:** Jest, React Testing Library, Jasmine

**Build Tools:** Webpack, Parcel

**Version Control System/DevOps –** SVN, GIT, GitHub

**Tools –** Visual Studio, Visual Studio Code

**Project/Quality Management –** JIRA, Redmine

**Database Management –** MongoDB, MySQL queries

**Operating Systems** – Linux, Windows

**Methodologies** – Agile (Scrum), SDLC, Waterfall
